

Design Services

FZ's Design Services simplify complex electrical projects by providing efficient and tested solutions. Our in-house team of professional engineers are licensed in states across the U.S. Each one of our designs presents a holistic solution incorporating safety, efficiency, scheduling, costing, integration, and speed to market. For everything from large industrial to healthcare facilities, you can trust FZ to provide the innovative ideas needed to make any project a success.

Design Services

- Preliminary Consulting
- Conceptual Design and Estimating
- Design Build
- Design Assist
- Integrated Project Delivery (IPD)
- Value Engineering
- Arc Flash (NFPA 70E) Studies and Training
- Building Information Modeling (BIM)
- Lighting Controls and Design
- Layout and Alternate Means and Methods
- Power Quality Analysis
- Trimble Point Creation and Layout
