Are you ready to take the first step towards Industry 4.0?

We understand that it can be overwhelming to know where to begin. With IIoT Out of the Box, you gain visibility to plant floor data that will help answer your questions around machine efficiency, downtime, and productivity. Throughout the process, you learn best practices that can be applied to improve your overall plant floor operations. Although small, these incremental changes can create lasting effects.

IIoT Out of the Box

Powered by Samsara
Starting at \$3,300

1. Contact the Michigan Manufacturing Technology Center at thecenter@rightplace.org or Feyen Zylstra at iiot@fzcorp.com to get qualified and start your Industry 4.0 transformation!
2. The MMTC will work with you and FZ to identify what data to collect.
3. We'll have an FZ Solution Engineer connect up your machine and the monitoring of production metrics begins!
4. After 15 days, you'll meet with FZ and the MMTC to discuss your experience, explore your data, and review next steps to further integrate Industry 4.0 into your current and future operations.

What's included with IIoT Out of the Box?

- Samsara IG21 with WiFi and 4G LTE Connectivity
- Cloud-based dashboards, alerts, and reports visible from web/mobile (Samsara IG License)
- Installation by a Feyen Zylstra Solution Engineer
- Meeting to review the collected data

Program Qualifications

- Target device: I/O or PLC which can be connected to Samsara IG21 (see supported systems/protocols below)
- Signed FZ/Michigan Manufacturing Technology Center/Right Place Agreement
- Safe plant floor environment

Supported Systems

- PLCs
- Flow computers
- IO expansion cards
- OPC-UA servers

Supported Protocols

- Modbus TCP
- Modbus ASCII
- Modbus RTU over TCP
- Ethernet IP
- OPC-UA
- ROC
- Serial
