

Machine Builder Solutions

We'll take your complex problems and make them simple.

For years, we've offered automation experience and innovative solutions that keep our machine builders and their customers at the top of their game. Behind the scenes, our team supports and supplements your work load while increasing value. In the process you're able to better serve your customers with machines that are more powerful, flexible, and productive.

Business Value

Reduce Costs: Keep your team productive while avoiding a 14 day quarantine

Reduce Risk: We understand safety and compliance regulations per state

Broaden Customer Access:
Access FZ's end user customer footprint

Stable Pricing: FZ can provide competitive and consistent installation rates

About FZ

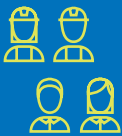

Founded in 1980

Turnkey electrical and automation services

HQ in Grand Rapids, MI, serving customers nationwide

550+ people strong

Culture: people, safety, core values

Value We Bring

Industry Experience

Our vast experience working within end user industrial plant floors allows us to provide lessons learned and value added solutions to your projects. We understand the demands of working within the ever-changing industrial manufacturing industry and are ready to provide additional insights throughout our work.

Platform and Software Expertise

Our team is system agnostic—meaning we have knowledge and experience integrating different design, PLC, HMI, vision, and motion platforms and systems. This knowledge allows us to supplement expertise on all platforms—adding value no matter the customer’s system or preference.

New Technology

We’ve worked with advanced and sophisticated systems and are constantly adding new tools and training to our roster.

Travel

We are open to travel and are able to meet you and your customers wherever you are at.

U.L. Certified Panel Build and Machine Wiring

As a U.L. Certified Panel shop, we build panels of all sizes and complexities to fit our customers’ varying levels of control and automation needs. Our team of experts can design custom solutions from the bottom up or take an existing design and bring it to life. We have experience working with all types of machine and device wiring.

Manpower

We have the manpower and resources needed to supplement your demands and capacity.

Turnkey Solutions and Support at Every Project Stage

Our team provides unmatched expertise in the design and specification, development, integration, and start up of a wide variety of machines. That paired with our broad range of capabilities in the control processes allows us to be your turnkey solution partner.
