Why FZ?

Committed to Innovation

Our strong relationship with CESMII has led to the founding of FZ's Innovation Center. Focused on Smart Manufacturing principals and technology, the Innovation Center provides educates and equips small to midsized manufacturers with the tools and information they need to be successful.

Proven Project Methodology

As both a consultant and a system integrator, our team has the experience and skills needed to architect and design a roadmap and then follow it through to completion. Backed with a strong controls house and a team of software developers, we have the bench strength needed to provide turnkey solutions from conception through to completion.

Platform Agnostic

At FZ we're solution driven, not product driven. This means we're committed to providing our customers with the product that is the best fit for their needs. Furthermore, we don't believe in implementing solutions that do not have a clear business case.
