

Food & Beverage Services

Continuous, Reliable Operations

Our understanding of plant floor safety, quality assurance, regulatory compliance, process innovation, energy efficiency, and cost control paired with over 40 years in the food processing industry, makes us a valuable and reliable project partner. We understand the ever-changing demands of the food and beverage industry and have designed electrical solutions that promote efficiency, sustainability, and reliability while being compliant with food safety standards.

No matter the environment, we understand the care and precision that goes into building and maintaining systems without interrupting critical plant operations.

Solutions

- Panel build and machine wiring
- Design build
- Electrical service
- Voice and data cabling
- Fiber optic cabling
- Paging systems
- Fire alarm systems
- CCTV and security systems
- Access control systems
- Temperature control systems
- Lighting control systems
- Plant wide network cabling
- Preventative maintenance
- Smart energy decisions

Completed Projects

- Mixing tanks
- Pet food processing
- Distribution systems
- Extruder installations
- Hopper installations
- Industrial oven installations
- Plant and line relocation
- Food plant service calls
- Soda and juice bottling plants
- Canned food processing
- Bulk bin feed systems
- Brine mixer systems
- Cryovac systems
