

Healthcare Services

Healthcare Services

Delivering reliable, compliant electrical healthcare solutions.

Feyen Zylstra partners with healthcare systems, facility teams, engineers, and construction managers to deliver electrical and low voltage solutions that prioritize safety, operational continuity, and regulatory compliance. With years of experience working in active, occupied healthcare environments, our teams execute with careful planning, coordination, and a focus on minimizing disruption to patient care and facility operations.

Our Approach

Preconstruction Driven

- Early budgeting and constructability input
- Phasing and shutdown strategy development
- Risk identification prior to construction
- Utility coordination and early long-lead item planning

Occupied Environments

- Infection control and containment planning
- Negative air and dust mitigation
- Off-hours and weekend scheduling
- Clear communication with hospital and facilities staff

Disciplined Execution

- Detailed shutdown planning and execution
- Clear and complete system documentation
- Transparent change management
- Proactive coordination with facilities and clinical teams

Core Capabilities

Electrical

- Normal & emergency power distribution
- Generators and critical power systems
- Fire alarm and emergency lighting systems
- Panels, feeders, and electrical pathways
- Planned shutdowns, tie-ins, & temporary power
- Electrical renovations & upgrades in active facilities

Systems & Technology

- Structured cabling and fiber optic backbone
- Wireless access point infrastructure
- Nurse call infrastructure support
- Security, access control, & surveillance systems
- Duress and critical communication systems
- MDF/IDF buildout and IT closet infrastructure
